#### **Grants, Contracts, and Research Support**

#### **Previous**

Methylphenidate and behavior therapy in the treatment of hyperactive children. State of Washington Biomedical Research Grant. 1978-1979: \$6,500.

The main and state-dependent effects of methylphenidate and pemoline on learning in hyperactive children. Committee on Faculty Research Support, Florida State University, 1980: \$5700: Hope Haven Association, 1980: \$2,500.

Developing Scholar Award, Florida State University, 1981-1982: \$5,000.

Child Study Center Summer Treatment Program. From 1980 to 1986 (excepting 1983), I conducted a large summer treatment program for children with learning and behavior problems and a small follow-up treatment program during the academic year. In the summer program, 60 children came to the FSU campus for a 7-week, behavioral treatment and assessment program (either day treatment or residential). In addition to the treatment, children and their parents participated in research, which included a wide range of basic and applied studies. Funding for the program was generated from parental and agency payments and supported my laboratory's clinical and research programs. Total program clinical revenues: \$230,000.

The role of alcohol in adult-child interactions (AA06267). Co-PI with A.R. Lang. NIAAA, 1985-1989: \$302,726 (Direct cost). Funded a series of laboratory studies that examined the relationship between hyperactive children's behavior and their parents' alcohol consumption.

Children's Summer Day Treatment Program and ADD Outpatient Clinic and Saturday Treatment Program. From 1986 to 1996, I directed the program described above at Western Psychiatric Institute and Clinic of the University Of Pittsburgh School Of Medicine. One hundred and fourteen children were enrolled annually in the 8-week summer program, and approximately 100 others in the outpatient and Saturday Treatment Programs. Average annual clinical revenues: \$600,000.

Attentional dysfunction in children with attention deficit disorder. PI with W. Schneider as Co-PI. University of Pittsburgh Office of Child Development Seed Grant. 1989-1990: \$4,780. Funded a series of laboratory studies that examined different components of attention in order to characterize the nature of the attentional processing deficit in ADD children and CNS stimulant effects thereon.

Depressed children's peer relations and their social-cognitive correlates: An application of psychosocial models of adult depression to depressed children's peer relations. Co-PI with Betsy Hoza. WPIC, NIH Clinical Research Center Seed Grant. 1989-1990: \$10,000. Funded a study that compared numerous dimensions of peer relationships in depressed, ADD, and control children.

Drug abuse vulnerability: Mechanisms and manifestations (P50 DA05605). Co-PI with Ralph Tarter as PI. NIDA. 1989-1994: \$4,502,551 (Direct cost); 1994-1999: \$6,172,144 (Direct cost). A 20-year, prospective longitudinal study of children at risk for the development of drug abuse. I functioned, during the first cycle, as the coordinator of the psychological module of the Center, with the task of developing the laboratory tasks designed to measure information processing, aggression, and impulsivity in the probands.

The role of alcohol in adult-child interactions (R01 AA06267). PI with A.R. Lang as Co-PI. NIAAA. 1990-1997: \$1,353,843 (Direct cost). This series of laboratory studies further examine the relationship between children's behavior and parents' drinking. Stress-induced drinking and the stress-dampening response to alcohol were investigated as a function of offspring psychopathology and family history of alcohol problems.

Cognitive-motivational factors in ADHD children (R29 MH47390). Co-investigator with Betsy Hoza as PI. NIMH. 1991-1996: \$349,987 (Direct cost). This study used a domain-specific approach to examine the cognitive/motivational processes of children with attention deficit hyperactivity disorder relative to control children.

Pharmacology and cognitive motivation in ADHD (R01 MH048157). PI with Betsy Hoza as Co-PI. NIMH. 1991-1997: \$1,107,192 (Direct cost). This series of studies examined the relationships among cognitive-motivational variables (e.g., attributions, persistence in the face of failure), pharmacotherapy with methylphenidate, and behavior in ADHD boys.

Computerized assessment of attention deficit (ADHD) (R43 HD30048). SBIR Grant to Psychology Software Tools with Walter Schneider as lead investigator. NICHD. Phase I-1992-1994: \$36,415. This effort developed a battery of cognitive tasks that can be used to assist in diagnosis and evaluation of medication response in ADHD children.

Alcohol use among adolescents with a history of attention deficit hyperactivity disorder. Co-PI with Brooke Molina. Pittsburgh Adolescent Alcohol Research Center Seed Grant. 1994-1995: \$7,500. This study investigated drug and

alcohol use among 100 adolescents with a history of ADHD.

Psychostimulant effects in the schools in adolescents with attention deficit hyperactivity disorder. PI. Abbott Laboratories, Ltd. 1994-1996: \$45,000 (Direct cost). Funded a study that examined the effects of a long-acting (pemoline) versus a short-acting (methylphenidate) psychostimulant on the academic and behavioral performance of ADHD adolescents in the regular school setting.

School-wide interventions for elementary children with disruptive behavior. PI. 1994-1996: \$20,000 contract with Alliance, Ohio Schools. Funded a project to develop a program to facilitate inclusion of disruptive children into the regular education mainstream.

Methylphenidate effects on ADHD adolescents (R01 MH045576). PI. NIMH. 1992-1997: \$768,975 (Direct cost). Funded a study that examines the acute dose-response effects of MPH on adolescents with ADHD using a wide variety of dependent measures across multiple domains of functioning.

Psychosocial and pharmacological treatment of ADHD (U01 MH50467). PI with Betsy Hoza as Co-I. NIMH. 1992-1997: \$1,608,194 (Direct cost). Funded a long-term, multimodal treatment outcome study for ADHD children. This project was one of the six sites of the Multisite Treatment for ADHD Study (MTA), an NIMH collaborative project.

Validity of DSM-IV subtypes of ADHD for young children (R01 MH53554). Co-PI with Benjamin Lahey as PI. NIMH. 1994-1999: \$1,590,880 (Direct cost). Funded a study of the validity and longitudinal course of the PreH and Combined Types of ADHD (as defined in the DSM-IV) in 4 to 6-year olds. Assessed and followed 120 ADHD children and 120 normal controls over five years.

School-wide intervention for middle school students with disruptive behavior. Co-PI with B. Molina (PI), B. Smith, & S. Evans. 1995-1996: \$30,000 contract with Alliance, Ohio Schools and seed funds from the WPIC Services Research Committee. Extended the elementary school project described above to the middle school setting.

Prospective follow-up for substance abuse and long-term follow-up of ADHD children. PI. McCune Charitable Trust. 1995-1997: \$20,000 (Direct cost). Funded the collection of prospective pilot data for projects on the development of substance use and abuse in ADHD individuals.

Community-based, school-wide interventions and Summer Treatment Programs for ADHD. PI. McCune Foundation. 1995-1998: \$500,000 (direct cost). Funded the development and implementation of school-wide interventions and summer treatment programs for ADHD children in three school districts and three community settings.

Supplement to and competing (continuation for Psychosocial and pharmacological treatment of ADHD (U01 MH50467). PI with Betsy Hoza as Co-PI. NIMH. 1996-1998: \$742,000 (Direct cost). Funded the addition of a long-term follow-up component to the multimodal treatment outcome study for ADHD children. This project was one of the six sites of the Multisite Treatment for ADHD Study (MTA), a NIMH collaborative project.

Comparative crossover study of OROS® (methylphenidate HCl), Ritalin, and placebo in children with ADHD. PI. Alza Corporation. 1997-1998: \$1,165,954 (Direct cost). Funded a study investigating the time-course and the efficacy of a new long-acting form of methylphenidate on social and academic behaviors in ADHD children and compares them to non-ADHD controls.

A comparison of Adderall and methylphenidate: Dose and time-course of effects in children with ADHD. PI. Richwood Pharmaceuticals. 1997-1998: \$72,324 (Direct cost). Funded the collection of data on the efficacy of Adderall in comparison with methylphenidate on ADHD individuals.

A double-blind fixed-dose study and open label follow-up of Transdermal Buspirone in the treatment of children with attention-deficit hyperactivity disorder. PI. Bristol-Myers Squibb. 1997-1999: \$200,000 (Direct cost). Funded the collection of data on the safety and efficacy of Transdermal Buspirone in ADHD individuals.

A comparison of b.i.d. Adderall and t.i.d. Ritalin. PI. Shire Laboratories, Inc. 1998-1999: \$74,958 (Direct cost).

Funded the collection of data on the efficacy of Adderall in comparison with methylphenidate on children with ADHD.

Double blind, variable randomization and discontinuation study in children with ADHD who meet response criteria during open-label treatment with atomoxetine HCl. Co-PI. Eli Lilly & Co. 1998-1999: \$61,112 (Direct cost). Evaluated the efficacy of atomoxetine HCl in treatment of children with ADHD.

Multicenter screening and efficacy study comparing the efficacy and safety of OROS® (methylphenidate HCl), Ritalin, and placebo in children with ADHD. PI. Alza Corporation. 1998-1999: \$259,375 (Direct cost). Comparing the efficacy of OROS® (methylphenidate HCl) with standard t.i.d. Ritalin dosing and placebo.

Long-term safety and effectiveness of OROS® (methylphenidate HCl) in children with ADHD. PI. Alza Corporation. 1998-2000: \$406,020 (Direct cost). Year-long study assessing the safety of timed-release OROS®.

Competing continuation for multimodal treatment study of children with ADHD (U01 MH50467). PI. NIMH. 1998-2001: \$720,259 (Direct cost). Funded continued long-term follow-up of the multimodal treatment outcome study for ADHD children. This project was one of the six sites of the Multisite Treatment for ADHD Study (MTA), an NIMH collaborative project.

Development of alcohol use and abuse in ADHD adolescents (R01 AA11873-01). Co-PI (with Brook Molina). NIAAA. 1998-2003: \$2,476,520 (Direct cost). Funded a follow-up study to assess risk for alcohol use, abuse and its development in 365 ADHD adolescents and 200 non-ADHD comparison adolescents.

A double-blind, placebo-controlled, steady state pharmacokinetic and efficacy study of a methylphenidate transdermal system compared to Ritalin-IR® in pediatric patients with attention deficit hyperactivity disorder. PI. Noven Pharmaceuticals, Inc. 1999: \$200,023 (Direct cost). Funded the collection of data on pharmacokinetics and efficacy of an investigational formulation of methylphenidate in children with ADHD.

A double-blind, placebo-controlled, dose-ranging study of four doses of a methylphenidate transdermal system in pediatric patients with attention deficit hyperactivity disorder. PI. Noven Pharmaceuticals, Inc. 1999: \$127,959 (Direct cost). Funded the collection of data on pharmacokinetics and efficacy of an investigational formulation of methylphenidate in children with ADHD.

A randomized, double-blind, placebo-controlled, parallel-group study of SLI381 in children with attention deficit hyperactivity disorder. Co-PI. Shire Laboratories, Inc. 1999-2000: \$130,652 (Direct cost). Funded the collection of data on the safety and efficacy of three doses of an investigational formulation of Adderall® in children with ADHD.

Pharmacological and psychosocial treatment use in elementary and middle schools. PI. ALZA Corporation. 1999-2001: \$45,000 (Direct cost). Funded the collection of data regarding general teacher practices related to classroom management techniques, medication administration and the use of various treatment interventions in relation to children with ADHD.

A 24-month, open-label study of SLI381 in children with attention deficit hyperactivity disorder. (Co-PI). Shire Laboratories, Inc. 1999-2002: \$152,320 (Direct cost). Funded the collection of data on the safety and efficacy of three doses of an investigational formulation of Adderall® in children with ADHD.

Attention deficit disorder and exposure to lead (R01 ES05015). Co-PI with Herbert L. Needleman (PI). NIEHS. 1999-2003: \$501,820 (Direct cost). Funded the collection of data on whether lead at low doses affects attention in children as measured by structured behavioral inventories.

A double-blind, placebo-controlled, dose-ranging study of three doses of a Methylphenidate Transdermal System in patients with attention deficit hyperactivity disorder in a summer treatment program. PI. Noven Pharmaceuticals, Inc. 2000: \$143,190 (Direct cost). Funded the collection of data on the safety and efficacy of three doses of an investigational formulation of methylphenidate in children with ADHD.

A multicenter, double-blind, placebo controlled, safety and efficacy study of Methylphenidate Transdermal System in pediatric patients with attention deficit hyperactivity disorder. PI. Noven Pharmaceuticals, Inc. 2000: \$125,452 (Direct cost). Funded the collection of data on the safety and efficacy of three doses of an investigational formulation of methylphenidate in children with ADHD.

A long-term, open-label study of Methylphenidate Transdermal System in pediatric patients with attention deficit hyperactivity disorder. PI. Noven Pharmaceutical, Inc. 2000-2001: \$78,367 (Direct cost). Funded the collection of data on the safety and efficacy of three doses of an investigational formulation of methylphenidate in children with ADHD.

Clonidine in ADHD Treatment (R01 NS39087). Co-PI with Floyd R. Sallee (PI). NINDS. 2000-2004: \$2,681,699 (Direct cost). Funded the collection of data regarding the safety and efficacy of Clonidine and combined treatments of ADHD in children.

Validity of DSM-IV subtypes of ADHD for young children (R01 MH53554). Co-PI with Benjamin Lahey as PI. NIMH. 2000-2005: \$2,067,450 (Direct cost). Funded a study of the validity and longitudinal course of the PreH and Combined Types of ADHD (as defined in the DSM-IV) in 4 to 6-year olds. Continued follow up on 120 ADHD children and 120 normal controls over five additional years.

A multi-center, double-blind, placebo controlled, safety and efficacy study of methylphenidate transdermal system in pediatric patients with attention deficit hyperactivity disorder. PI. Noven Pharmaceuticals, Inc. 2001-2001: \$41,639 (Direct cost). Funded the study of relative effects of different doses of a methylphenidate transdermal system (MTS) in children with ADHD.

A double-blind, dose-response, placebo-controlled study of a methylphenidate transdermal system in pediatric patients with ADHD. PI. Noven Pharmaceuticals, Inc. 2001-2003: \$271,152 (Direct cost). Funded the study of relative effects of different doses of a methylphenidate transdermal system (MTS) in children with ADHD, in the presence and absence of intensive behavioral treatment.

Disinhibition and early risk for substance use. (R03 DA014386). Co-I with Craig Colder (PI). NIDA. 2001-2003: \$100,000 (Direct cost). Examined the coherence of individual differences that are germane to disinhibition, as well as the relationship between disinhibition and associations with deviant peers and whether disruptive behavior problems mediate this relationship.

Development of drug abuse and delinquency in ADHD adolescents (F31 MH001303). NIMH 2001-2004: \$26,518. National Research Service Award Fellowship for Andy Lopez-Williams.

An open label study of MethyPatch® in children with ADHD. PI. Noven Pharmaceuticals, Inc. 2001-2005: \$49,200 (Direct cost). Funded an open label study of the effectiveness of a methylphenidate transdermal system in children with ADHD.

A compassionate use study of methylphenidate transdermal system in pediatric patients with attention deficit hyperactivity disorder. PI. Noven Pharmaceuticals, Inc. 2001-2006: \$113,408 (Direct cost). Funded an open label study of the effectiveness of a methylphenidate transdermal system in children with ADHD.

ADHD treatment: Comparative and combined dosage effects. (R01 MH062946). PI. NIMH. 2001-2007: \$1,164,008 (Direct cost). Funded the study of relative effects of and interactions between different doses of behavioral and pharmacological treatments for ADHD by evaluating their separate and combined effects in a controlled summer program setting.

Development of drug use and abuse in ADHD adolescents (R01 DA12414). PI. NIDA. 2001-2008: \$625,000 (Direct cost). Expanded to include the assessment of non-alcohol drugs in a protocol funded by NIAAA to examine the onset and development of alcohol abuse in 365 adolescents and young adults previously diagnosed with ADHD.

ADHD treatment: Comparative and combined dosage effects (R01 MH062946). NIMH 2002-2003: \$25,990;

Research Supplement for Underrepresented Minorities for Adia N. Onyango.

Clinical training in assessment and treatment of ADHD (F31 MH064243). NIMH 2002-2004: \$26,518. National Research Service Award Fellowship for Gregory A. Fabiano.

Early otitis and literacy and attention at 9 to 11 years (R01 HD42080). Co-PI with Jack L. Paradise (PI). NICHD. 2002-2005: \$675,000 (Direct cost). Investigated whether persistent otitis media with effusion (OME) during children's first 3 years of life results in impairments at ages 9 to 11 years of their literacy, attentional abilities, or related skills, and if so, whether prompt tympanostomy-tube placement (TTP) is efficacious in preventing or lessening such impairments.

Preschool supplement to Clonidine treatment of ADHD (R01 NS039087). Co-PI with Floyd R. Sallee (PI). NINDS. 2002- 2006: \$2,130,442 (Direct cost). Funded the collection of data regarding the safety and efficacy of Clonidine and combined treatments of ADHD in children.

The School-wide academics and behavior competencies program (R305L030065) PI. 2003-2004 (contract). Buffalo Public School District. \$95,000 (Direct cost). Developed school-wide discipline models in four schools in BPS and establish two K-3 classrooms at the Center for Children and Families to meet the needs of the students from the four schools. The program afforded students the ability to develop positive individual behaviors while also helping to promote academic achievement.

School-wide academic and behavioral competencies program (L03000665A). PI. Institute of Education Sciences (IES). 2003-2007: \$1,288,518 (Direct cost). Seeks to evaluate the effects of the School-Wide Academic and Behavioral Competencies (ABC) Program provided over a 3-year period on children's social and behavioral development in a public-school setting. Part of the IES Social and Character Development Initiative.

The development of alcohol use and abuse in ADHD adolescents (R01 AA11873). Co-PI with Brook Molina (PI). NIAAA. 2003-2008: \$5,274,291 (Direct cost). Funded a follow-up study to assess risk for alcohol use, abuse and its development in 500 ADHD adolescents and 200 non-ADHD comparison adolescents.

A 9-week, randomized, double-blind, placebo-controlled, flexible-dosage (up to 425mg/day), parallel-group study to evaluate the efficacy and safety of the Modafinil film-coated tablet in children and adolescents with Attention-Deficit/Hyperactivity Disorder. Co-PI with James Waxmonsky (PI), Cephalon, Inc. 2004-2005. \$117,500 (Direct cost). Evaluated the efficacy and safety of modafinil, titrated to an optimal dose according to tolerability and perceived efficacy, in children and adolescents with attention deficit/hyperactivity disorder (ADHD). This study was a pivotal trial for the Phase 3 ADHD program.

The School-wide academics and behavior competencies program. PI. 2004-2005 (contract). Buffalo Public School District. \$95,000 (Direct cost). Developed school-wide discipline models in four schools in BPS and establish two K-3 classrooms at the Center for Children and Families to meet the needs of the students from the four schools. The program afforded students the ability to develop positive individual behaviors while also helping to promote academic achievement.

Treatment for single mothers of children with ADHD (F31 MH071090). NIMH 2004-2005: \$26,152. National Research Service Award Fellowship for Anil Chacko.

ADHD treatment: Comparative and combined dosage effects (R01 MH062946). PI. NIMH. 2004-2007: \$215,840 (Direct cost). Competing supplement extended the results of our funded analogue setting study of varying doses of behavioral and stimulant treatment to school settings. Outcome measures included survival to medication use, generalizability of dose responses from the STP to the school setting, ending doses after maintenance treatment, and the effects of individual differences.

Positive illusions in ADHD: Processes and consequences (R01 MH065899). Co-PI with Betsy Hoza (PI). NIMH. 2004-2007: \$1,250,000 (Direct cost). Investigated the processes underlying ADHD children's positive illusory self-perceptions and the consequences of childhood positive illusory thinking for young adult adjustment.

Establishing State-Of-The-Art Afternoon Summer Treatment Programs (STP) at Buffalo Public Schools (BPS) for Children with ADHD Impairments. PI. Children's Guild Foundation. 2007: \$16,660. Established an afternoon STP for children with ADHD-related impairment at BPS #27 in the summer of 2007.

Enhancing Individual Education Plans for Children with Attention-Deficit/Hyperactivity Disorder Using a Daily Report Card (R324J060024). Co-I with Gregory Fabiano (PI). IES. 2006-2008: \$502,296 (Direct cost). The funded study provided preliminary evidence of the efficacy of using a daily report card intervention (DRC), long used as an efficacious intervention for children with ADHD, as a means of linking the child with ADHD's IEP goals and objectives to his/her daily functioning in the classroom environment.

Effects of Strattera and Behavior Therapy on the School and Home Behavior of Elementary School Children with Attention-Deficit/Hyperactivity Disorder (ADHD). Co-I with Daniel Waschbusch (PI). Eli Lilly and Company. 2006-2008. \$169,600 (Direct cost). The primary objective of the proposed study was to evaluate the therapeutic effects of Strattera alone and in combination with behavioral therapy on the school functioning of children with ADHD. The protocol was designed to detect any potential synergistic effects of combination treatment with Strattera and BT in the classroom.

Center for Children and Families' Summer Treatment Program. From 1997-2009, I conducted a large summer clinical treatment program at the University at Buffalo for children with learning and behavior problems and a small follow-up treatment program during the academic year. The summer program was an 8-week behavioral treatment program that enrolled between 36 and 96 children and adolescents per year. In addition to treatment, children and their parents participate in research. Average annual clinical revenues: \$125,000.

Parent Training for Fathers of Children with ADHD (R34 MH078051). Co-I with Gregory Fabiano (PI). NIMH. 2007-2010: \$450,000 (Direct cost). This study developed a manualized treatment for fathers and related program materials; investigated the efficacy of the novel parenting program for fathers to a control group in a small clinical trial; and investigated the efficacy of integrating the novel father-based intervention into a standard behavioral parent training program that includes mothers and fathers.

Dissemination of the Summer Treatment Programs for Childhood ADHD. PI. John R. Oishei Foundation. 2007-2010. \$413,981 (Direct cost). This project established Summer Treatment Programs at five community-based sites in Western New York.

Inhibitory control and clinical response in ADHD (R01 MH069434). Co-PI with Larry Hawk (PI). NIMH. 2005-2010: \$1,834,118 (Direct cost). Sought to expand studies of inhibitory control in ADHD children, investigating separate and combined effects of motivational incentives and medication relative to normal control performance. Specific goals included relating results of the cognitive tasks to measures of behavior and classroom performance taken in a naturalistic setting to bridge the gap between laboratory studies and behavioral studies.

Validity of DSM-IV subtypes of ADHD for young children (R01 MH53554). Co-PI with Benjamin Lahey as PI. NIMH. 2005-2011: \$2,484,259 (Direct cost; \$92,446.00 – UB Site). Funded a study of the validity and longitudinal course of the PreH and Combined Types of ADHD (as defined in the DSM-IV) in 4 to 6-year olds. Continued follow up on 120 ADHD children and 120 normal controls over five additional years.

Head Start University Partnership Research Grants: Strategies for Developing Teacher Effectiveness (90YR0017). Co-I with Gregory A. Fabiano, Ph.D. DHHS/ACF. 2008-2011. \$459,039 (Direct cost). This project developed, piloted and implemented a randomized controlled trial of teacher training strategies for Head Start program teachers and teacher assistants. Specifically, a one-day in-service on classroom management procedures was compared to a weeklong experiential learning condition.

Evidence-Based Practices for Childhood and Adolescent Mental Health Problems. PI. The Children's Trust. 2010-2011. \$136,391 (Direct cost). Funded services that increase the capacity of mental health, health, and educational communities in Miami-Dade County with respect to knowledge and implementation of evidence-based practices

(EBPs) in childhood and adolescent mental health.

A Novel Multimodal Intervention for Children with ADHD and Impaired Mood (R34 MH080791). Co-I with James Waxmonsky (PI). NIMH. 2008-2012. \$405,000 (Direct cost). This study proposed to develop an integrative psychosocial treatment that combines aspects of behavior modification programs for ADHD with cognitive-behavioral and psychoeducation techniques for pediatric and adult mood disorders.

Development and Validation of a Teacher Progress Monitoring Scale for Elementary School Teachers (R305A080337). Co-I with Gregory A. Fabiano, Ph.D. USDOE/IES. 2008-2012. \$409,484 (Direct cost - UB Site). This project developed, piloted, and validated a measure of teacher behaviors that are related to classroom management procedures and can be used to monitor progress when behavior modification procedures are implemented.

Behavior modification and young ADHD children (R01 MH069614). PI. NIMH. 2005-2012: \$2,022,649 (Direct cost). Studied the effectiveness of different doses of psychosocial treatment for young children with ADHD. Children were randomly assigned to receive either no, low-intensity, or high-intensity behavioral treatments for 3 years. Specific questions included whether the need for medication in those children is delayed or eliminated and whether lower doses can be used, when medication is necessary, as a function of “dose” of behavioral treatment.

Adaptive Treatments for Children with ADHD (R324B060045). PI. IES. 2006-2012. \$1,842,147 (Direct cost). The major goal of this project was to extend the analogue-setting efficacy study of multimodal treatment into an effectiveness study to investigate both the sequencing of interventions and the relative effects of low dose combined treatments vs. high dose unimodal treatments utilizing an adaptive treatment SMART design.

Does Pharmacological Treatment of ADHD in Adults Enhance Parenting? Co-I with James Waxmonsky (PI). Shire Pharmaceuticals, Inc. 2010-2012. \$274,991 (Direct cost). The goal of the study was to explore whether treating parents with ADHD with the stimulant medication lisdexamfetamine (LDX) improves their parenting.

Postdoctoral Training in Intervention Research for Children with Disruptive Behavior Disorders (R324B090010). PI. USDOE/IES. 2009-2013. \$435,000 (Direct cost). Funded two post-doctoral training fellowships in intervention research in school settings for children with disruptive behavior disorders.

Evidence-Based Practices for Childhood and Adolescent Mental Health Problems. PI. The Children’s Trust 2012-2013. \$89,090 (Direct cost). The provider delivered services that increase the knowledge and capacity of professional and paraprofessional mental health, health, and educational staff, as well as parents in Miami-Dade County through providing information, training and web-based resources. Topics included a wide range of EBPs relevant to improving mental health, familial relationships, social skills and academic functioning of children and adolescents. This work expanded the joint initiative by the Florida International University (FIU) Center for Children and Families and the Society of Clinical Child and Adolescent Psychology of the American Psychological Association.

Callous-Unemotional Traits and Parent Training in Children with Conduct Problems (R34 MH085796). Co-I with Daniel Waschbusch (PI). NIH. 2011-2014. \$275,000 (Direct cost). Developed a novel approach for implementing behavioral intervention for children with serious conduct problems.

Development of drug use and abuse in ADHD adolescents (R01 DA012414). PI. NIDA. 2008-2015: \$1,136,852.27 (Direct cost). Expanded to include the assessment of non-alcohol drugs in a protocol funded by NIAAA to examine the onset and development of alcohol abuse in 500 adolescents and young adults previously diagnosed with ADHD.

Improving Parenting Capacity to Promote Safe Driving for Adolescents with ADHD (R01 HD058588). Co-I with Gregory Fabiano (PI). NICHD. 2010-2015. \$2,296,447 (Direct cost; \$57,421 – FIU Site). Funded the first randomized controlled trial for the treatment of driving behavior for adolescents with ADHD.

Increasing Academic Success in Middle School Students with ADHD (R34 MH092466). PI. NIMH. 2012-2016. \$439,620.59 (Direct cost). Evaluated a parent-teen-teacher collaborative intervention to address the academic difficulties of middle school students with ADHD.

- A Novel Approach to Stimulant-Induced Weight Suppression and its Impact on Growth (R03 MH083692). Co-PI with James G. Waxmonsky, M.D. NIMH. 2009-2016. \$2,194,373.28 (Direct cost). The study evaluated the long-term growth impact of stimulants in children with ADHD and developed evidence-based interventions for the prevention of stimulant induced growth suppression.
- Improving Medication Adherence in ADHD Adolescents (R01 MH097819). PI. NIMH. 2014-2016. \$2,292,888 (Direct cost). Tested an adherence intervention for adolescents with ADHD who are not compliant with their medication regimen.
- Dissemination Initiative. PI. Society for Clinical Child and Adolescent Psychology. 2010-2016. \$547,600 (Direct cost). Funded the dissemination of treatment information about evidence-based practice to mental health, health, child welfare, and educational professionals and to the general public.
- Development of a Kindergarten Transitional Program for Preschool Students Identified as Being at High-risk for Behavioral Disorders (R324A120136). Co-I with Paulo A. Graziano (PI). IES. 2012-2016. \$1,000,500 (Direct cost). The study was conducted to improve the functioning of incoming kindergarteners who have been identified as being at high-risk for behavioral disorders and are transitioning to kindergarten.
- A Summer Preparatory Program for Middle and High School Students with ADHD (R324A120169). PI. IES. 2012-2016. \$2,539,626.32 (Direct cost). Evaluated an intensive, adolescent-directed Summer Preparatory Program for Adolescents with ADHD transitioning to middle or high school.
- A Summer Program for Elementary Aged Children at Risk for Serious Behavioral Problems (1422-7290). Co-I with Erika Coles (PI). The Children's Trust. 2012-2015. \$409,090.04. (Direct cost). Study conducted to run an intensive summer treatment program for elementary aged children.
- Promoting Successful Transitions to Kindergarten: A Summer Readiness Program for Preschoolers Identified as Being at High-Risk for Behavioral Disorders (1429-7290). Co-I with Paulo A. Graziano (PI). The Children's Trust. 2012-2015. \$272,721 (Direct cost). The study was conducted to improve the functioning of incoming kindergarteners who have been identified as being at high-risk for behavioral disorders.
- Development of Strategies to Increase Teacher Integrity in a Daily Report Card (DRC) Intervention for Children with Attention Deficit Hyperactivity Disorder (ADHD) (R324A120272). Co-I with Erika Coles (Co-I) with Julie Owens (PI). IES. 2012-2016. \$1,233,350. (Direct cost; \$485,872 – FIU Site). Developed and evaluated the feasibility and preliminary efficacy of a multi-modal consultation intervention in improving the teacher integrity and student outcomes in the context of an evidence-based treatment for children with ADHD.
- Episodic memory and suggestibility in children with Attention Deficit Hyperactivity Disorder (R03 HD077161). Co-I with Lindsay Malloy (PI). NICHD. 2014-2017. \$96,639 (Direct cost). Compared ADHD and typically developing children's memory reports of a staged laboratory event and has implications for developing effective interviewing strategies for children with ADHD.
- Heterogeneity in ADHD: Autonomic, Behavioral, Emotion, and Treatment Response (R03 MH106854). Co-I with Erika Musser (PI). NIH. 2015-2017. \$100,000 (Direct cost). Followed prior work of those who have begun to examine the role of emotion reactivity and regulation in ADHD.
- Developing a Peer to Peer Behavioral Intervention for High School Students with ADHD (R305A150433). Co-I with Margaret Sibley (PI). IES. 2015-2018. \$951,025.35 (Direct cost). Collaborated with Miami Dade County Public Schools to develop and pilot a behavioral intervention for ninth grade students with ADHD and related impairments that was delivered by academically successful 11th and 12th grade peers under the supervision of a high school faculty sponsor.
- Effectiveness of MI Enhanced Behavior Therapy for Adolescents with ADHD (R01 MH106587A). Co-I with Margaret Sibley (PI). NIH/NIMH. \$1,319,795 (Direct cost), 2014-2019). Tested the effectiveness of the STAND intervention for adolescents with ADHD delivered in a community mental health setting to examine whether the intervention

improves academic and family functioning.

A meta-analysis of social and behavioral outcomes for ADHD in school settings (R324A160133). Co-I with Gregory Fabiano (PI). IES. \$512,286 (Direct cost), 2016-2019). Funded a comprehensive meta-analysis of school-based intervention treatment studies to understand which intervention practices are associated with positive outcomes for students with ADHD.

Enhancing Father Engagement to Promote Social, Behavioral, and Academic Outcomes (R324A130237). Co-PI with Gregory Fabiano (Co-I). IES. 2015-2019. \$1,263,036.37 (Direct cost). Developed a father-focused intervention for children with ADHD to make it suitable for use in educational setting.

The development of alcohol use and abuse in ADHD adolescents (R37 AA11873). Co-PI with Brook Molina (PI). NIAAA. 2013-2019. MERIT: \$5,966,337 (Direct cost: \$2,763,008 – FIU Site). Funded a follow-up study to assess risk for alcohol use, abuse and its development in 365 ADHD adolescents and 200 non-ADHD comparison adolescents.

Neural Correlates of Adult Outcomes of Childhood ADHD: Affect, Reward, and Control (R01 MH101096). Co-I with Brooke Molina (PI). NIMH. 2014-2019. \$2,068,778 (Direct cost; \$177,285 – FIU Site). Examined the PALS follow up sample of ADHD adults the functioning of neural system supporting “hot” EF – i.e. reward modulated inhibitory control and interference control of emotionally salient information.

Examining Tolerance to CNS Stimulants in ADHD (R01 MH099030). PI with James Swanson and James Waxmonsky. NIMH. 2013-2020. \$2,284,784 (Direct cost). Evaluated the short-term tolerance using the most well-established protocol for measuring controlled stimulant effects. A school- year follow- up in the same participants evaluated individual differences in the developmental of tolerance over sustained treatment.

FIU-ABCD: Pathways and Mechanisms to Addiction in the Latino Youth of South Florida (U01 DA041156). Co-I with Raul Gonzalez, Jr. (PI). NIH. 2015-2020. \$8,845,619 (Direct cost). FIU served as a site for a nation-wide project (The Adolescent Brain Cognitive Development Study) that was designed to understand environmental, psychosocial, genetic, cognitive, and neurobiological differences that make some children more likely to use drugs and develop substance use disorders.

### **Active**

Substance Use Intervention for Teens with ADHD (R01 DA034731). PI. NIDA. 2014-2021. \$1,898,858 (Direct cost). Evaluates a brief prevention program for adolescents with ADHD and emerging substance use, followed by a randomized assignment for nonresponders to further psychosocial or multimodal treatment or monitoring.

Adaptive Response to Intervention (RTI) for Students with ADHD. (R305A170523). PI. USDOE/IES. 2017-2021. \$2,251,821 (Direct cost). Assesses whether behavioral interventions following an adaptive Response to Treatment (RTI) framework result in better outcomes for students with ADHD than the types and sequences of interventions typically available in school.

Center for Children and Families’ Summer Treatment Program. Since 2010, I have conducted a large summer clinical treatment program at Florida International University for children with learning and behavior problems and a small follow-up treatment program during the academic year. The summer program is an 8-week behavioral treatment program that enrolls between 240 children and adolescents each summer. In addition to treatment, children and their parents participate in research. In 2013-2019, five federal and two local community grants funded the program, which now serves 300 children with ADHD and related conditions annually.

Biosignatures of Executive Function and Emotion Regulation in Young Children with ADHD. (R01 MH112588). Co-I with Paulo Graziano and Anthony Dick (PIs). NIMH. 2017-2022. \$1,804,337 (Direct cost). Examines the feasibility of creating a risk index based on multiple biosignatures that may aid in the identification of behavioral/neuropsychological phenotypes of ADHD.

FIU Center for Reducing Health Disparities in Substance Abuse & HIV in South Florida. (U54 MD012393). Co-I with Eric Wagner (PI). NIMHD. 2017-2022. \$8,983,556 (Direct cost). Develop and sustain a national clinical and behavioral research program addressing health inequities and disparities associated with substance use problems and HIV for underrepresented minorities.

A Novel Examination of the Cognitive and Neurobiological Deficits Underlying Increased Reaction Time Variability in Children with ADHD. (R21 MH112002). Co-I with Joseph Raiker (PI). NIMH. 2017-2020. \$275,000 (Direct cost). More fully elucidate the underlying neurobiological and neurocognitive mechanisms that underlie the attention deficit in attention-deficit/hyperactivity disorder (ADHD).

Enhancing IEP Implementation of Children with ADHD Using Daily Report Cards: An Efficacy Trial. (R324A180175). IES. Co-PI with Gregory Fabiano, 2018-2022. \$2,969,495 (Direct cost). Evaluates in an RCT the impact of a Daily Report Card on enhancement of children's performance in their daily IEP goals in their special educational settings.

Training Program in Adolescent Substance Use Disorders and Co-Occurring Mental and Behavioral Disorders. (T32DA0434499) NIDA. 2019-2024. PI. \$1,480,581 (Direct cost). The Florida International University T32 training program includes a large number of faculty with expertise in mentoring, administration, and research in adolescent SUD and related disorders.

FIU-ABCD: Pathways and Mechanisms to Addiction in the Latino Youth of South Florida (U01 DA041156). Co-I with Raul Gonzalez, Jr. (PI). NIH. 2020-2027. \$8,845,619 (Direct cost). FIU serves as a site for a nationwide project (The Adolescent Brain Cognitive Development Study) that is designed to understand environmental, psychosocial, genetic, cognitive, and neurobiological differences that make some children more likely to use drugs and develop substance use disorders. It will also examine how health, cognition, and neurobiology are affected by drug use and addiction.

The Pittsburgh ADHD Longitudinal Study: Predicting alcohol misuse, problems and disorder in mid-adulthood. (AA027494-01A1). Co-I with Brooke Molina (PI). NIMH. 2020-2025. \$406,183 (Direct cost). Funds an extension of a Pittsburgh ADHD Longitudinal Study (PALS), which has been collecting information about long-term outcomes of ADHD since 1999. To date, data have been collected on participants through the age of 30; this proposal enables the completion of data collection through age 35 and additional collection through the age of 40.

### **Pending**

Pending (Pelham) 2021-2026 IES  
Does Concurrent Stimulant Medication in Initial Treatment have an adverse impact on the Effectiveness of School-based Behavioral Intervention for Students with ADHD?  
This proposal aims to test the hypothesis that concurrent medication implemented in combination with a behavioral intervention has a negative effect on the implementation of and effectiveness of classroom behavioral interventions for ADHD, compared to a behavioral intervention implemented alone.

Pending (Fabiano) 2021-2025 IES  
An Evaluation of Common Section 504 Accommodation Plan Supports  
This proposal will investigate the efficacy of common academic accommodations (extra time, frequent breaks, low-distraction environment, and adaptive furniture) provided for children with attention-deficit/hyperactivity disorder (ADHD) in school settings under Section 504 of the Americans with Disabilities Act. Children with ADHD also typically receive positive behavioral supports as accommodations/interventions, and classroom behavior management is well established as an efficacious intervention for ADHD in school settings. Role: Co-PI.

Pending (Villodas) 2021-2025 IES  
Development of an After-School Intervention for Children with ADHD and Disruptive Behavior Problems  
The purpose of this project is to test the efficacy of a low-burden intervention that targets academic motivation and

organization, time management, and planning (OTP) skills in ninth grade students with ADHD and related impairments. Role: Co-I.

Pending (Schatz) 2021-2025 IES  
Interventions for English Language Learners at Risk for ADHD  
The goal of the proposed project would be to identify best practices for students who are English language learners (ELL) and also demonstrate problematic behaviors in the classroom. Role: Co-PI.

Pending (Pyle) 2021-2025 IES  
Developing and Evaluating an Educator-Focused Professional Development in Data Use  
This purpose of this proposal is to develop and evaluate an educator training model for use with in-service teachers and related service providers. Role: Mentor.

Pending (Schatz) 2021-2024 IES  
Development of a Technology-Assisted Intervention to Improve Homework Performance Among Children with ADHD  
The purpose of this proposal is to improve homework performance and homework problems among children with Attention-Deficit Hyperactivity Disorder (ADHD) while increasing the reach and reducing the cost of standard behavioral interventions by leveraging technology. Role: Co-I.

Pending (Schatz) 2021-2026 IES  
Systematic Replication of the Efficacy of Daily Report Cards for Students with ADHD: Variations on Implementation Supports  
The proposed systematic replication of prior causal impact studies will be the first large-scale efficacy trial of DRCs to systematically vary the implementation supports (i.e., behavioral consultant, web-based DRC implementation tool) provided to parents and teachers. Role: Co-PI.

Pending (Fabiano) 2021-2025 IES  
Enhancing Parent Engagement to Promote Social, Behavioral, and Academic Outcomes: An Efficacy Trial  
For the purposes of the current study, families of children with ADHD (ages 6 through 12) would be randomly assigned to one of three groups: COACHES, COACHES plus a behavioral consultant to help parents implement the strategies, or a wait-list control group. Families in the wait-list control group would be able to participate in COACHES following the final assessment point. Role: Co-PI.

Pending (Fabiano) 2021-2024 IES  
Development of Strategies to Reduce the Impact of the Relative Age Effect  
This proposal aims to develop a teacher intervention to attenuate the impact of the relative age effect on young elementary school children at risk for negative social and behavioral outcomes. To investigate the effectiveness of an intervention aimed at reducing the negative impacts of being relatively young for the grade using an iterative development process, the project will develop and evaluate the promise of intervention components for supporting the youngest students in primary grades at risk for negative social and behavioral outcomes that impact learning. Role: Co-PI.

Pending (Pelham) 2021-2026 IES  
A Randomized, Controlled Trial of Treatment Sequencing for Children with ADHD  
The proposed study will evaluate the treatment sequences that were developed in the Sequential, Multiple Randomized Trial (SMART) trial using a randomized, controlled trial with a community comparison group.

### **Continuing Education Activities**

Local: Over the past 40 years, I have given hundreds of local in-service training workshops without charge to educators, health and mental health professionals, and parents in Washington State, North Florida, Pennsylvania, Ohio, New York, and South Florida.

- National: Pelham, W.E. (1986 to 1995, 1997, 2000, 2001). *Comprehensive treatment of children with ADHD*. Pre-convention institute given at the annual meeting of the Association for the Advancement of Behavior Therapy.
- Cantwell, D., Greenhill, L., Klein, R.G., & Pelham, W.E. (1994). *Therapeutic management of ADD*. Developed this continuing education program for 100 grand rounds and other presentations in conjunction with SCP Communications and Columbia University. (Presented 9 of the 100 presentations that were given.)
- Pelham, W.E., & Pellock, J. (1994, December and 1995, March). *Treatment strategies in ADHD*. Co-Chair of the Planning Committee of CME Video-program and CME Videoconference on ADHD, through KSP Communications and the Medical College of Virginia.
- Pelham, W.E., & Pellock, J. (1995, April). *ADHD today: Clinical wisdom for the practitioner*. Served as Co-Chair and organizer for this continuing education conference sponsored by Discovery International. Aspen, CO.
- Sallee, F.R., & Pelham, W.E. (1995, October). *Practical management of ADHD: Children to young adults*. Co-Chair of this continuing education conference sponsored by Access Medical Group, Palm Beach, FL.
- Pelham, W.E. (1995, 1996, November). *ADHD in children and adults: Recent advances in diagnosis, assessment, treatment*. Workshop presented at the 3rd Annual Santa Fe Symposia, sponsored by the New England Educational Institute, an accredited sponsor for continuing education.
- Pelham, W.E. (1996, 1998, 2001). *Comprehensive treatment of childhood/adolescent ADHD*. Pre-convention workshop for the Division 12 Postdoctoral Institutes held immediately preceding the annual meeting of the American Psychological Association.
- Pelham, W.E. (1996, 1997, August). *ADHD in children, adolescents, and adults: Recent advances in diagnosis, assessment, and treatment*. Workshop presented at the 13th Annual Cape Cod Summer Symposia sponsored by the New England Educational Institute.
- Pelham, W.E., & Burrows-MacLean, L.D. (1999, July). *Child-based treatment for ADHD: Summer programs, Saturday programs, and social skills training*. Workshop presented at the Niagara Conference for Evidence-Based Treatments of Childhood Mental Health Problems, Niagara-On-The-Lake, Ontario, Canada.
- Hoffman, M.T., & Pelham, W.E. (1999, July). *Interdisciplinary model for assessment and intervention with ADHD: Integrating assessment, diagnosis, and multimodal interventions*. Workshop presented at the Niagara Conference for Evidence-Based Treatments of Childhood Mental Health Problems, Niagara-On-The-Lake, Ontario, Canada.
- Pelham, W.E. (2000, March). *Combining psychosocial and pharmacological treatments for ADHD: Empirically validated treatments*. Workshop presented at the National Association of School Psychologists, New Orleans, LA.
- Pelham, W.E. (2000, April). *Comprehensive treatment of children with ADHD*. Workshop presented for the Mental Health Association of Suffolk County, Inc., Lindenhurst, NY.
- Pelham, W.E. (2000, June). *Behavioral/psychological treatment for ADHD in children, adolescents, and adults*. Workshop presented for the Northwest Mental Health Institute, Redmond, OR.
- Pelham, W.E. (2000, October). *Comprehensive, behavioral, pharmacological, and combined treatment for ADHD: State of the art in evidence-based treatments*. Workshop presented at Dalhousie University, Halifax, Nova Scotia, Canada.
- Pelham, W.E. (2000, October). *Combining psychosocial and pharmacological treatments for ADHD: Empirically validated treatments*. Workshop presented at the annual meeting of the New York Association of School Psychologists.
- Pelham, W.E., & McCabe, P. (2000, November). *Managing ADHD in the classroom*. Workshop presented at the annual meeting of the New York State Parent Teachers Association, Buffalo, NY.
- Pelham, W.E. (2001, March). *Comprehensive, behavioral, pharmacological, and combined treatment for ADHD: State of the art in evidence-based treatments*. Workshop presented at the University of Kentucky, Lexington, Kentucky.
- Pelham, W.E. (2001, April). *Comprehensive, behavioral, pharmacological, and combined treatment for ADHD: State of the art in Evidence based treatments*. Workshop presented at the University of Nebraska Medical Center, Omaha, Nebraska.
- Pelham, W.E. (2001, May). *Evidence-based treatment for children with attention deficit hyperactivity disorder*. Workshop presented to Summit Educational Resources, Buffalo, New York.
- Pelham, W.E. (2001, July). *Just the Facts, Please*. Participant in roundtable CME discussion in Newport

- Beach, California, McNeil Pharmaceuticals.
- Pelham, W.E. (2001, July). *Child-based treatment for ADHD: Summer programs, Saturday programs, and social skills training*. Workshop presented at the Niagara Conference for Evidence-Based Treatments of Childhood and Adolescent Mental Health Problems, Niagara-On-The-Lake, Ontario, Canada.
