Physics BS at a Glance

Program Overview:

The (B.S.) degree in Physics prepares students for graduate study in physics, engineering, or material science; or for careers in research, industry, or government. Students often work with the Department's faculty members in their research labs. Many students present the results of their research at national conferences and publish them in journals. The Department's research laboratories are well equipped with state-of-the-art instrumentation.

Prerequisites:

| MAC 2311 Calculus I          | PHY 1033 First-Year Physics Seminar |
| MAC 2312 Calculus II         | MAP 2302 Differential Equations     |
| MAC 2313 Multivariable Calculus | CHM 1045 General Chemistry I       |
| PHY 2048 Physics with Calculus I | CHM 1045L General Chemistry Lab I  |
| PHY 2048L General Physics Lab I | CHM 1046 General Chemistry II      |
| PHY 2049 Physics with Calculus II | CHM 1046L General Chemistry Lab II |
| PHY 2049L General Physics Lab II |

Available Concentration:

Engineering Concentration
Health Physics Concentration
Careers/Job Opportunities:

- Graduate School in Physics, Astronomy, Engineering, Math, Computer Science
- Industry (Research and Development)
- Finance and Banking
- Computer Science/Tech Sector
- Research Jobs in Civilian Government, including National Labs
- High School Teachers
- Military
- National Intelligence (FBI, CIA, NSA)

Recommended Minors or Second Majors:

- Astronomy
- Mathematics
- Chemistry
- Geology
- Meteorology

Advising Contact Information:

College Requirements:

All majors in the college must complete 45 credits of upper division prior to graduation. Upper division courses are 3000/4000 level courses, major courses and outside electives can count towards this requirement.

No 1 and 2-credit physical activity courses can be counted towards the 120 credits needed for graduation.
