

## Sustainability and the Environment BA at a Glance

### Program Overview:

The Sustainability and the Environment BA program introduces students to the problems of sustainability. Students will learn about factors that determine the sustainability of human institutions, organizations, cultures, and technologies in different environments. This program not only build on the skills generated by discipline-based study, but makes it possible to address the linkages between people in their social, natural, and built environment. Students will work on real-world challenges using various approaches. By engaging a breadth of knowledge and experience, and by acquiring the skills to integrate various domains of knowledge, sustainability students prepare themselves for a variety of careers.
