Mathematical Data Science- Statistical & Mathematical Data Analytics Track (Fall 2025)

This undergraduate major in Mathematical Data Science – Statistical & Mathematical Data Analytics Track is designed to help prepare Math/Stat students for careers in Data Science, a field rapidly expanding in the private sector. Because computer programming and machine learning are among the primary components of Data Science, most data scientists currently have been trained as computer scientists. The Track focuses on quantitative, mathematical, and statistical techniques and aligns with students who may plan to pursue a graduate math degree.
